

USING YOUR POWERVault+

Charging your phone

Charging your phone is easy. Take the supplied cable and plug the USB end into your PowerVault+. Then plug the Micro USB end into your device. If it doesn't begin charging automatically press the button on your PowerVault+

If you have an iPhone you'll need to use your Apple cable.

Recharging your Power Vault+

Plug the Micro USB end of your cable into your PowerVault+. Then plug the other end into the USB plug on your computer or adapter. You can check your power level any time by pressing the button.

Safety Notices

- Please don't get the PowerVault+ wet as it could damage it permanently.
- Don't take the PowerVault+ apart (there are no serviceable parts inside).
- Don't expose the PowerVault+ to extreme temperatures, or to rapid changes from hot to cold or vice versa.
- Don't dispose of it in a fire as it may explode.
- Don't dispose of your PowerVault+ in household waste. Please take it to your local council recycling depot or drop it off at a recycling centre.

Li-ion

Do not dispose of Lithium-ion batteries with general waste. Please return it to battery recycling collection point.

POWER VAULT+

USER GUIDE

Made in China.

Designed
in Yorkshire

damsonglobal.com

NEVER RUN OUT OF POWER

PowerVault+ is our way of making sure your phone's always on when you need it to be.

Power Vault+ is compatible with many portable electronic devices including smart phones, iPhone (when connected with an Apple cable)*, tablets and wireless headphones.

4 LED lights indicate current charge level. Each light represents 25% power. It is recommended to charge PowerVault+ when only 1 light is visible.

Power Vault+ will automatically power off when its internal battery reaches 100%. It will also power off once your device has been charged or after a period of no use.

*Apple cable not included

ABOUT YOUR POWER VAULT+

Power LED Indicator

Button

- Press once to start charging or to check power level.
